HARDWEAR

**MASTERS AT WORK.
MASTERS OF WORKWEAR.**

NEW LOOK, NEW PRODUCT, NEW SCRUFFS.

2017

Scruffs delivers exceptional quality and technical performance at an affordable price. With innovation, durability and great design at the core of our products, we're the brand of choice for professional tradespeople who pride themselves on skill, mastery of their craft and looking the part.

The all new Scruffs catalogue is your 'must-see' guide to this season's workwear, footwear and accessory essentials.

'PERFORMANCE FIRST' PRODUCTS

At Scruffs we know that great performance relies on having the right kit for the job, that's why we're continually working hard to expand and develop our product range.

We're delighted to introduce some exciting new products that take pride of place in the Scruffs collection:

New! **Sharpe Boot**

Goodyear welted to deliver outstanding durability.

New! **Expedition Thermo Softshell**

Fully insulated and lightweight for ultimate freedom of movement.

New! **Women's Expedition Thermo Jacket**

Lightweight, warm and durable with a female form comfort fit.

New! **Worker Jacket**

Great value waterproof jacket that's crafted with a durable ripstop fabric.

MASTERS AT WORK. MASTERS OF WORKWEAR.

Look out for our national marketing campaign 'Masters at Work. Masters of Workwear'. It's a celebration of your skill and dedication, championing the passion and commitment it takes to become a master of your trade.

The campaign features a ground-breaking 360 'virtual reality' film of the toughest trek to work, a perilous climb to the top of the Severn Bridge in gale force conditions. Literally taking workwear to new heights! Watch the film and find out more at themastersatwork.com

Make sure you also check out Scruffs on Facebook, Twitter and YouTube to get involved in our conversation, news and competitions!

SCRUFFS.

FOR THE MASTERS AT WORK, BY THE MASTERS OF WORKWEAR.

SIZE GUIDE pg.131

BUILT FOR EXTREMES

CHOOSE YOUR WORK BOOT WISELY. A LOT DEPENDS ON IT.

STAY DRY

Scuffs footwear with GORE-TEX® is completely waterproof.

Waterproof always means waterproof, right?

Not always. The minimum EN Standard says that footwear has to withstand up to 1,000 walking action 'flexes' for 15 minutes in ankle-deep water to be labelled as 'waterproof'.

But who works for 15 minutes a day?! Is that really good enough?

Only footwear with GORE-TEX® technology delivers genuine all-day waterproofness, because it's tested to withstand up to 300,000 flexes for 80 hours in ankle-deep water.

That's over 3 days non-stop, and you'll still have completely dry feet.

When we say waterproof, we really mean waterproof. Ultimately, dry feet deliver the all-day comfort you need to stay focused on the job.

STAY COOL

Scuffs footwear with GORE-TEX® BREEEATHES.

Hot, sweaty feet can be a real problem...

During a hard day's graft on site your feet can produce up to 200ml of sweat - that's a third of a pint of acidic moisture that in turn can lead to serious foot health problems.

Scuffs safety footwear with GORE-TEX® is engineered using breathable membrane technology to let moisture out, keeping your feet dry from the inside - regardless of whether it's warm or cold outside.

Dry, moisture-free feet deliver the all-day freshness you need to work in comfort.

STAY SMART

Investment in your feet is money spent wisely.

Every part of Scuffs safety footwear with GORE-TEX® is made to guaranteed, high quality standards.

From the most breathable leather to the hardest working soles it delivers lasting durability that pays you back in the long run.

There are enough challenges in the working day, without being let down by personal gear that doesn't work...

Make sure you invest in safety footwear that works as hard as you do.

COMPLETELY WATERPROOF | FULLY BREATHABLE | CONSTANTLY COMFORTABLE

SIZE GUIDE

SCRUFFS FOOTWEAR SIZE GUIDE

FIT TIPS

Not all brands of footwear fit the same. The standard size guide below is a good indicator on what size you should wear, but there may be slight variations in sizing between different brands. Most foot problems can be prevented by wearing properly fitting footwear. Don't assume that your footwear size remains the same. The shape of your feet changes as you get older. Have both feet measured regularly as most people have one foot larger than the other. Fit to the largest foot. Always try footwear with your regular work socks. Make sure that they are laced properly. The ends of your toes should not touch the front part of the footwear. To double check the fit, untie the laces and slide your forefinger down the back of the footwear behind the heel. The ends of your toes should hit the front toe part of the footwear.

SCRUFFS CLOTHING SIZE GUIDE

MEASUREMENT TIPS

The fit of workwear depends on the cut, fabric and styling of the garment. If you're not sure, follow our top tips on how to measure yourself. Then refer back to the detailed workwear size guide shown below so you know which size you should buy.

CHEST (A)

Measure around the fullest part of the chest. Place the measuring tape high up under your arms and make sure it's at the same height at the back across your shoulder blades.

WAIST (B)

Measure around your natural waist line, on top of any underwear that you normally wear.

INSIDE LEG (C)

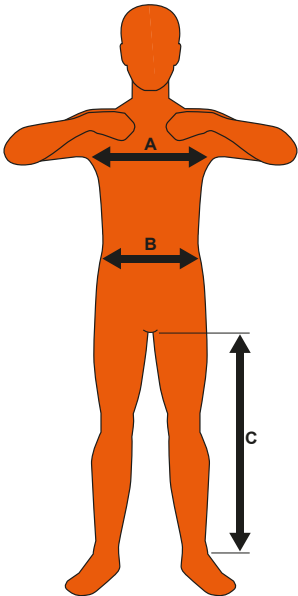

Measure from the top of the inside leg at the crotch to the hem.
