NEW TROUSER RANGE

Trousers are one of the highest value items in a workwear wardrobe. The average trade professional has six pairs, so it's vital that they're fit for purpose. Whether working in cold, wet or dry conditions, up high or indoors, trouser requirements remain the same – the highest levels of comfort, durability, protection and styling.

EXTRA STRETCH - NO SWEAT

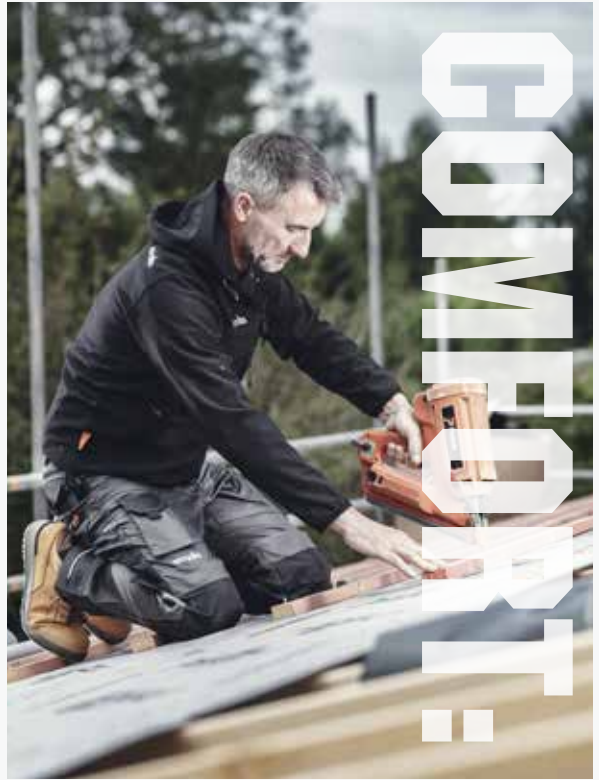

FLEXIBLE COMFORT

This comes from hard wearing, high performance 2 & 4-way fabrics that deliver ultimate freedom of movement. They hold their shape well too, reshaping instantly on rebound, and they're easy to care for:

- 2-way stretch is a mechanical fabric that's strong, flexible and moisture wicking, best suited to working in tougher conditions.
- 4-way stretch is a super flexible, comfortable fabric that's especially suited to working in tight spaces for extended periods.

MOISTURE WICKING

Now comes as standard on Scruffs mechanical stretch fabric trousers, drawing sweat away from the body to keep the wearer cool and dry.

PERFECT SIZING

The new Scruffs trouser range now offers choice across the two most popular fits – slim and regular.

The 'fit' refers to how trousers sit from the waist to the thighs:

- Regular fit trousers sit straight on the hips and thighs.
- Slim fit trousers sit more tightly in comparison.

It's a personal choice, but you'll know what fit suits you best in terms of all-day comfort.

STORE MORE

Scruffs trousers come loaded with features to ensure that they are right for a wide variety of jobs.

Designed with genuine users they offer easy access storage for the task at hand, along with secure pockets for personal objects. The all-important phone pocket is always close-to-hand too, along with essential holders such as tool and hammer loops.

FUNCTION!

REASSURANCE

DURABILITY:

Hard wearing fabrics which are specially designed to be resistant to abrasions, tears and scuffs - along with reliable components, combine to maximise product life.

CORDURA®

CORDURA® is a hard wearing fabric that's made with high strength nylon fibres to provide durable, anti-abrasion protection in high wear areas such as the knees. Three types are used across the Scruffs trouser range:

CORDURA® CLASSIC

Military grade fabric with excellent abrasion and tear resistance.

CORDURA® BALLISTIC

Military body armour grade dense nylon fabric that has excellent tear resistance and good abrasion resistance.

CORDURA® NATURELLE™ (STRETCH FABRIC)

Superior performance ultra-lightweight, supple fabric with excellent tensile strength and good abrasion & tear resistance.

ABRATECT™

Abratect™ is an anti-abrasion fabric developed by Scruffs. It provides extra durability against scuffs and rips in higher wear areas to keep Scruffs trousers working harder for longer.

YKK

YKK deliver unrivaled reliability with robust, high-quality zips, which are vital to maximise product life. That's why every single pair of Scruffs trousers in the range is fitted with a YKK zip.

ICE:

TRUST THE NAME

Scruffs delivers the reassurance of partnering with a highly dependable workwear brand. Trusted because of extensive investment in research and development, Scruffs employs experts who focus purely on workwear to deliver the most suitable materials, the best designs and functional features that work.
